

# The new Austrian real estate register

Inspiration study tour 2013/10/10

**BEV - Bundesamt für Eich- und Vermessungswesen**

# Content

- **New real estate register**
  - real estate register in numbers
  - initial situation and trigger
  - project goals
  - players and stakeholders
- **Sub projects**
  - migration
  - cadastre management application
  - digital cadastre archive
  - distribution system
  - IT-infrastructure
- **Process optimization**

# Real Estate Register in numbers

- **Digital Data (area-wide coverage)**
  - approx. 10 million parcels (41 cadastral offices)
  - approx. 3 million register units (140 district courts)
  - approx. 6 million owners
  - several million intabulated rights (many of them mortgages – credit system!)
  - approx. 10 million update transactions per year
- **Benefit**
  - property assurance and ease of transfer
  - strategic spatial planning instrument
  - approx. 20 million queries per year
  - approx. 14 million Euros revenue per year (not including 1.1% intabulation fee and 3.5% real estate transfer tax)

# Initial situation and trigger

- **Initial situation in 2005**
  - real estate database: core register for Austrian e-government
  - host based hierarchical database using technology of the seventies
  - co-ownership Federal Office of Metrology and Surveying (BEV) and Ministry of Justice (BMJ)
  - new requirements regarding flexibility, expandability, ease of integration, manageability
- **Trigger**
  - initiative of federal ministry of justice (BMJ) in 2005
  - council of ministers' resolution from 2005, August 9

## Project goals

- modern, flexible, expandable, standardised e-government infrastructure for
  - improved accessibility
  - lower risk
- integration into existing system architectures
- improved real estate rights management process
  - elimination of media conversions
  - process automation
  - simplified quality assurance by integrated digital workflows
- fulfilling customer needs with new or improved products and better accessibility (digital subdivision map, cadastral map preview, parcel history, product web service...)
- improved traceability  $\Rightarrow$  digitally signed products from cadastre and real estate register including archives

# Players and stakeholders

- **Sponsors**

- BEV (representing the Federal Ministry of Economy, Family & Youth)
- Federal Ministry of Justice (BMJ)

- **Partners**

- Federal Computing Center (BRZ) => implementer and provider for BMJ
- Federal Ministry of Finance (BMF) => Project manager and future administrator for BMJ

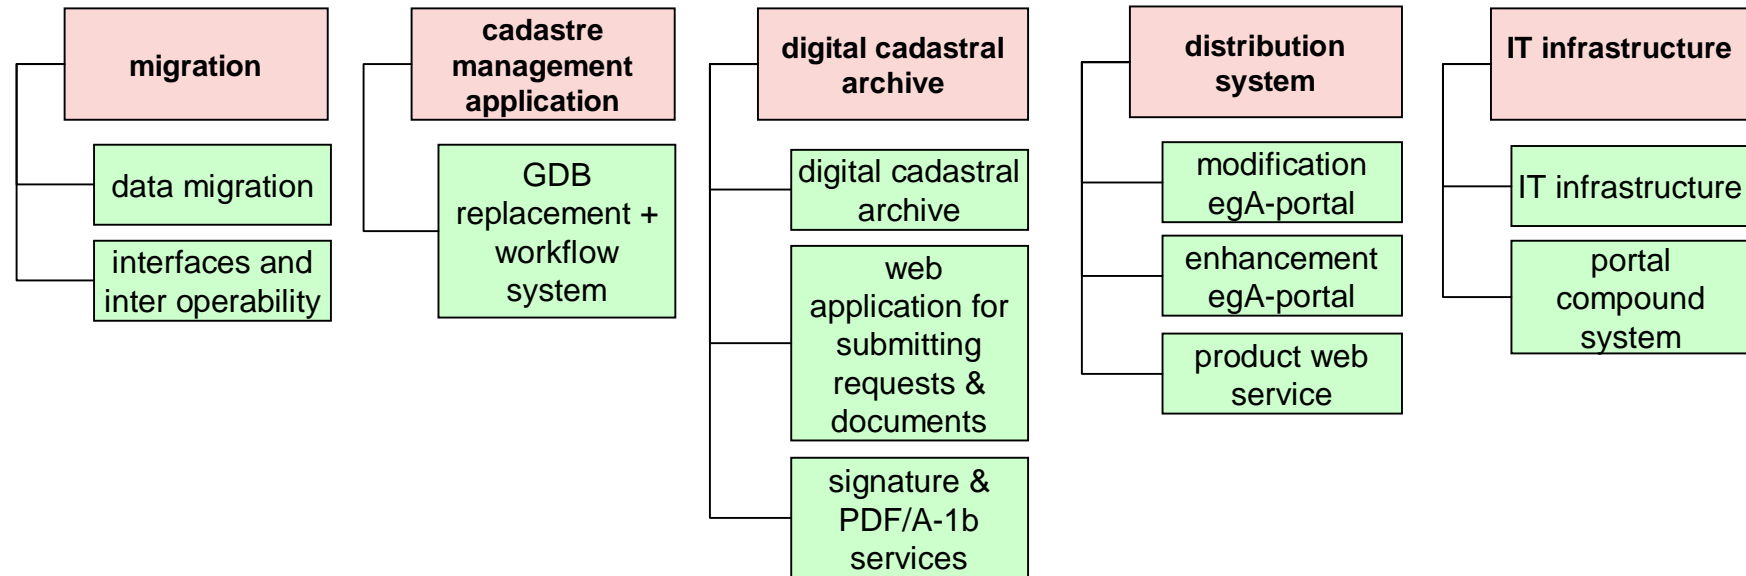

- **Main stakeholders**

- Federal agencies, provinces, municipalities
- Surveyors
- Notaries, lawyers
- Data providers
- Software producers
- Users

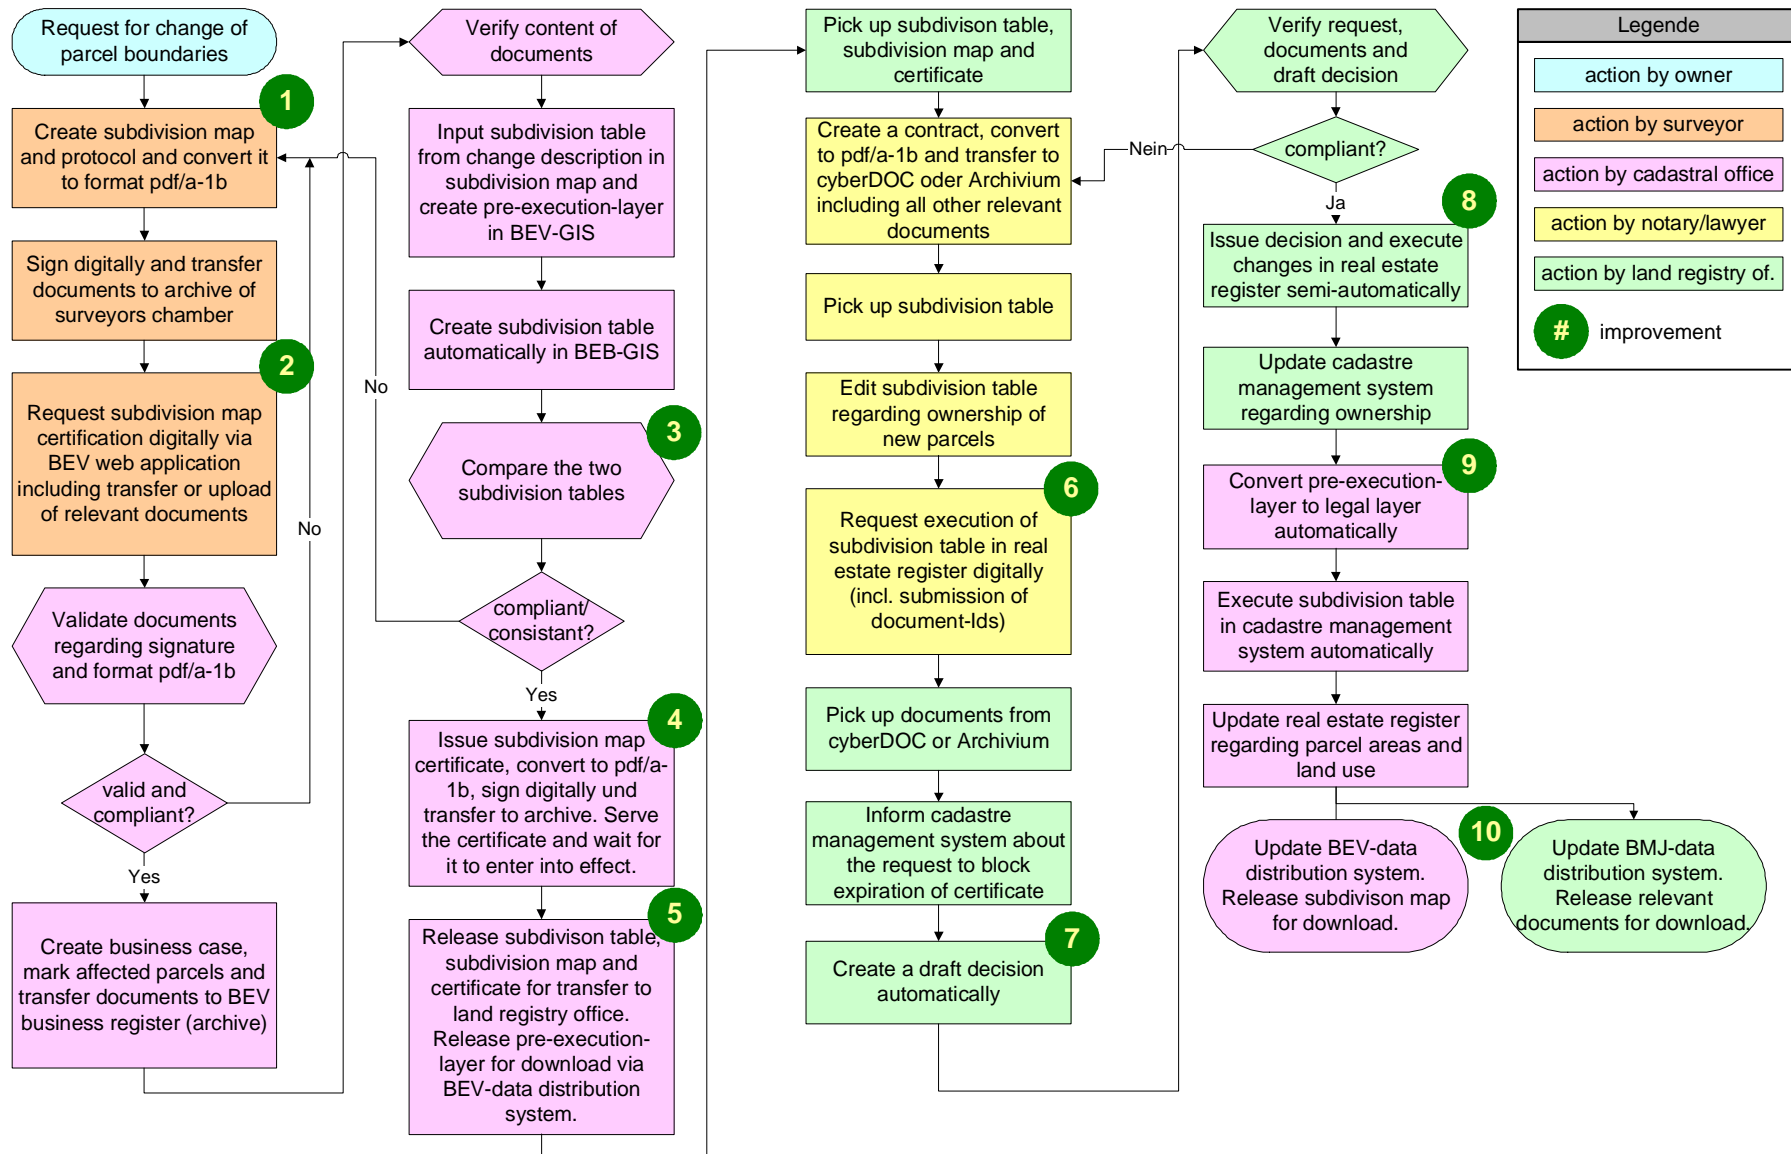

# BEV sub projects

# Improvements of parcel modification process

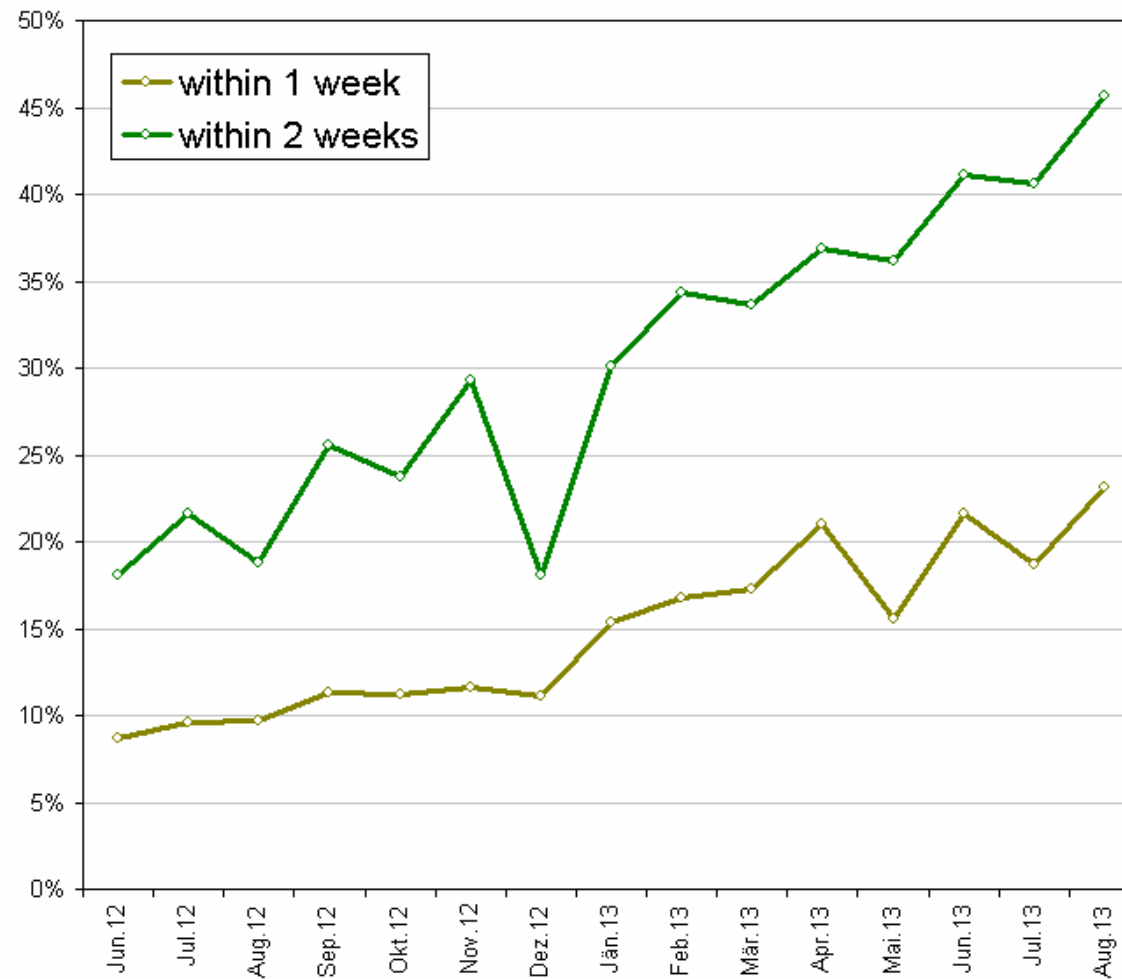

# Reduction in long running cases

Number of subdivision map certification cases not completed within three month in 2013

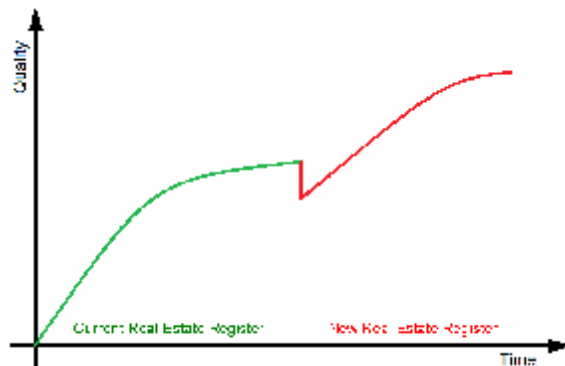

# Increase in short running cases

Map Certification issued within one or two weeks

# Main challenges

- **Complexity**
  - data (historical data, exceptions)
  - systems (large number of external systems for integration)
  - players and stakeholders (inter agency cooperation, independence of jurisdiction, stakeholder interests, ...)
  - processes (exceptions, procedures in different states of progress)
- **High expectations**
  - legacy application at end of lifecycle (30 years of CIP)
  - reengineering without benefit of green field approach

**Thank you for your attention**
