

List of Priority Indicators for Agricultural and Rural Development

N°		INDICATORS	CORE DATA REQUIREMENTS
A. Sector-Wide Indicators for Agricultural and Rural Development			
P1	1	Public spending on agriculture as a percentage of GDP from the agriculture sector	Government budget allocations, disbursements and spending on items related to agriculture; national agriculture value-added data
P2	2	Public spending on agricultural input subsidies as a percentage of total public spending on agriculture	Government budget allocations, disbursements and spending on items related to subsidies on agricultural inputs as well as total spending on agriculture
P3	3	Prevalence (percentage) of underweight children under five years of age in rural areas	Anthropometric data
P4	5	Food Production Index	Area, production and yield data for major crops, livestock numbers and yields, felling rate, fishery production statistics
P5	6	Annual growth (percentage) in agricultural value added	Values of inputs and outputs of agricultural commodities
B. Specific Indicators for Subsectors of Agriculture and Rural Development			
P6	7	Rural poor as a proportion of the total poor population	Household income and consumption estimates
P7	22	Change (percentage) in yields of major crops of the country	A time series of crop yields per unit of land area for major crops or crops covered by a specific programme
P8	26	Annual growth (percentage) in value added in the livestock sector	Values of input used in livestock sector and output produced
P9	32	Capture fish production as a percentage of fish stock (or a rating of the state of major capture fish stocks relevant to exports and local food)	Scientific estimates of fishstocks and exploitation rates or perceptions/assessment of community of fishers on increasing or decreasing fish stock
P10	41	Proportion (percentage) of land area covered by forest	Area of forest, land area
P11	46	Percentage of the rural population using financial services of formal banking institutions	Total number of rural households; number of which requested/accessed credit and/or savings from formal banking institutions
P12	52	Public investment in agricultural research as a percentage of GDP from the agriculture sector	Budget allocations to agriculture research institutions, GDP for agriculture
P13	56	Irrigated land as percentage of crop land	Total crop land area; irrigated crop land area
P14	66	Change (percentage) in sales/turnovers of agro-enterprises	Benchmarks and subsequent data on enterprises covering sales, cost structures, and gross and net profits
C. Indicators for Thematic Areas related to Agriculture and Rural Development			
P15	71	Percentage of farmers who are members of community/producer organizations	Total number of farmers; number of farmers who are members of community/producer organizations
P16	76	Withdrawal of water for agricultural as a percentage of total freshwater withdrawal	Area equipped for irrigation; area under different crops under irrigated and rainfed conditions; irrigation intensity and water requirement ratios of different crops; number of irrigations actually provided by farmers in season (on an average in an area); estimates for per capita water consumption by humans and animal; information on lift water irrigation devices (e.g. wells), etc.
P17	77	Proportion (percentage) of land area formally established as protected area	Information on land area of formally protected areas; total land area of the country or project area
P18	78	Change (percentage) in soil loss from watersheds	Area that has become uncultivable or has witnessed substantially reduced yields due to soil erosion and total area of watershed
P19	81	Percentage of land area for which there is a legally recognized form of land tenure	Total land area and area over which holders have a welldefined right to access and use
